

St. Andrew's Library Media Program
Mission and Objectives

The mission of the library media program is to ensure that members of the St. Andrew's Episcopal School community are effective and ethical users and creators of ideas and information.

This mission is accomplished by:

- providing intellectual and physical access to materials in all formats
- providing integrated instruction to foster competence and stimulate interest in reading, viewing, and using information and ideas
- working with teachers to design learning strategies to meet the needs of students as they enter college and work environments

The library media program can work to meet the objectives of your program by:

1. collaborating with you on specific units to integrate information and communications technology skills into your curriculum
2. team teaching with you to ensure students' mastery of 21st century skills, new technologies, and digital resources
3. bringing new media tools into your teaching and learning to further communication and community building
4. retrieving materials from our physical and online collection to meet specific objectives
5. hands-on training for you to implement available technology for instruction and professional productivity
6. serving as an extension of your classroom and instructional program—e.g. We can develop online pathfinders for specific assignments so students have time saving one-stop shopping for needed resources
